What will I learn in this tutorial?

This package contains a color-printed lesson on creating your own quilting designs for the embroidery machine or robotic quilter, and coordinating videos that will play in your computer's DVD drive. **Requires DVD 16x or higher, Windows XP or higher.**

These lessons are creative guides to building your own quilting designs. All lessons are shown using 4D QuiltDesign Creator * software. The exercises are sequenced from the simplest level to the complex, so you build your skills as you work through them, and include many different techniques.

You will learn to create a design, save it as a working file, and then export as a quilting design, as an embroidery design, or as a graphic line-style clip art. Whether you have a quilting frame with robot, or an embroidery machine, or you have it all, this tutorial will teach what you need to know to create your own unique quilting designs.

Lessons cover using wizards, changing designs, creating multiplied, mirrored, or chained designs, working with motif-stitch fills, creating and editing vector-style graphics, and drawing your own clip art. Creative techniques are included for both robotic quilting designs and embroidery designs.

You will also find many additional hints and tips, techniques, and fun ideas!

The videos and written guides follow each other step-by-step, and you can watch before you create, or work along as you watch or review the video.

Video lessons allow you to stop, back up or repeat a segment, or replay them as many times as you need until you have mastered the skill.

Printed Exercise and Video inside! Watch, Read, Create!

Have you already met Janie at a hands-on class or seminar?

Then you are familiar with her clear, easy-to-follow instructions and gentle sense of humor! *She teaches you the 'why' behind what you do!*

Now you can take home Janie's much-acclaimed expertise on video, watch while you follow the printed lesson, and complete the exercise while you refer back to the video's extensive menus!

- You work at your own pace, any hour of the day or night!
- **Learning has never been so entertaining and effortless!**
- It is like having private lessons in your home!
